## RESEARCH INTERESTS

---

Machine Learning, Big Data Systems, and Geospatial Data Analytics

## EDUCATION

---

- **Arizona State University** Tempe, Arizona  
*PhD in Computer Science* *Aug. 2018 – Jul. 2023 (Expected)*
  - **Graduate Courses:** Distributed Database Systems, Statistical Machine Learning, Fundamentals of Statistical Learning, Data Mining, and Semantic Web Mining
- **Chittagong University of Engineering and Technology** Chittagong, Bangladesh  
*Bachelor of Science in Computer Science and Engineering* *Mar. 2010 – Nov. 2014*
  - **Undergraduate Courses:** Programming in C/C++, Object Oriented Programming, Data Structure, Algorithms, Software Engineering, and Artificial Intelligence

## EXPERIENCE

---

- **Data Systems Lab @ASU** Tempe, Arizona  
*Research Assistant* *Aug. 2018 - Present*
  - **Spatio-Temporal ML:** Developing a spatio-temporal machine learning framework on top of PyTorch
  - **NLIDB Benchmark:** A benchmark for evaluating natural language to SQL query synthesis approaches
- **Arizona State University** Tempe, Arizona  
*Teaching Assistant* *Aug. 2018 - Present*
  - **Courses:** Distributed Database Systems, Data Processing at Scale, Object Oriented Programming and Data Structure, Principles of Programming with Java and Python, Programming of Programming with C++
- **Gagagugu PTE LTD** Dhaka, Bangladesh  
*Software Engineer* *Jan. 2017 to Jun. 2018*
  - **Projects:** Android applications featuring functionalities related to social networking and communication systems.
- **Le Chef Plc** Dhaka, Bangladesh  
*Android Application Developer* *Aug. 2015 - Dec. 2016*
  - **Projects:** Android applications featuring services such as online order and reservation systems for restaurants
- **ICT Division** Bangladesh  
*Trainer of Mobile Application Development* *May 2015 - Jul. 2015*
  - **Responsibilities:** Trained about 100 undergraduate students on topics related to Android development.

## PROJECTS

---

- **Hotspot Analysis:** Calculating Getis-Ord statistic of NYC Taxi Trip data, performing spatial queries and spatial operations such as range join.
- **Optimizing Hyperparameters:** An experimental work which performs comparative evaluation of Bayesian optimization and grid search for optimizing CNN parameters.
- **GGfone:** An Android application developed while working at Gagagugu PTE LTD supporting features such as international calls, wifi calls, and credit balance transferring between users.
- **GagaGugu:** An Android application developed while working at Gagagugu PTE LTD featuring social networking and communications such as status update, messaging, and calls.
- **ChefOnline - Order Takeaway App:** An Android application for restaurants developed while working at Le Chef Plc supporting features such as online orders and reservations.

- **LARS with SystemML:** Evaluating Deep Learning in SystemML using LARS Optimizer.
- **NLIDB-Bench:** A benchmark to evaluate state-of-the-art natural language to SQL synthesis approaches
- **Multi-layer Neural Network from Scratch:** Scratch implementation of a multi-layer neural network and functions such as activation, loss, dropout, forward and backward propagation, etc. using numpy.
- **SparkSQL Data Visualization:** Consists of two parts: an API in Scala retrieves the data stored in SparkSQL using spark clusters and a Javascript front end visualizes the data using deck.gl visualization library.

---

- **Kanchan Chowdhury**, Venkata Vamsikrishna Meduri, Mohamed Sarwat; NLIDB-Bench: A Benchmark for Evaluating Natural Language Interfaces to Relational Databases.
- **Kanchan Chowdhury**, Lamia Alam, Shyla Sarmin, Safayet Arefin, Mohammed Moshiul Hoque; A Fuzzy Features Based Online Handwritten Bangla Word Recognition Framework. *18th International Conference on Computer and Information Technology*, 2015

---

## TECHNICAL SKILLS

- **Languages:** Python, Java, C, C++, Scala, Javascript, SQL, HTML
- **Tools and Libraries:** Apache Spark, PyTorch, Scikit-learn, Keras, Jupyter Notebook, and Android SDK
- **Databases:** MySQL, SparkSQL, PostgreSQL, and SQLite
- **Others:** Apache Sedona, Machine Learning and Deep Learning Models, , Deck.gl Data Visualization Library, Rest API, Various Google APIs, and JSON Parsing

---

## PARTICIPATION AND AWARDS

- Recipient of CIDSE Doctoral Fellowship at Arizona State University for the academic year 2018-2019.
- 2nd Runner-up at National Hackathon organized by ICT Division of Bangladesh in 2014 for proposing solution to a national problem of the country.
- 2nd Runner-up at Mobile Application Code Hub organized by Bangladesh University of Engineering and Technology in 2014.
- 6th at Inter University Programming Contest organized by Chittagong University of Engineering and Technology in 2012.
- Recipient of Honors award from Chittagong University of Engineering and Technology for excellent academic result during undergraduate studies.

---

## PROBLEM SOLVING

I solved 305 problems on UVa Online Judge, 46 problems in Light OJ and participated in many programming contests both in real-time and online. I also answered some questions on StackOverflow.
